

BEAUTY will result from the form and correspondence of the whole, with respect to several parts, of the parts with regard to each other, and of these again to the whole; that the structure may appear an entire and complete body, where in each member agrees with each other, and all necessary to compose what you intend to form.

Our unique material solution engineered specially for production of casted kitchen sinks. The material is primary made of pure and natural quartz which makes it very strong and durable. The quartz aggregate is bounded together with dedicated resin and additional refining compounds creating material dedicated for kitchen environment. Our products have uniform void-free structure and are resistant to very high temperatures. Perfect surface finish ensures high level of hygiene and makes it easy to clean. Chemical and physical characteristics of our material allow for casting products of various shapes and sizes. From small and compact solutions to large sinks. In addition, the material comes with a wide range of colour options, from cool to warm tones.
